

PRODUCT SAFETY INFORMATION

All products manufactured by Newly Weds Foods Co., and the ingredients comprising these products, are “foods” regulated under the Canadian Food and Drugs Act and Regulations and are not currently subject to WHMIS Material Safety Data Sheet (MSDS) and label requirements. As food products not representing any known hazard to human health during normal usage, a “MSDS” specific to each product is not required.

However, misuse or poor handling of these products in your facility could create a potentially hazardous condition. If the products are mishandled in a fashion that creates airborne dust, they may be irritant to some persons present in the work area and, under certain environmental conditions, the resultant mixture may be explosive in the presence of an open flame, spark, or other ignition source.

Products produced by Newly Weds Foods Co. should be stored in clean, cool, and dry areas, with inventory ordered, rotated, and handled in accordance with good manufacturing practices. Should you require additional information or suggestions regarding proper storage and handling of Newly Weds Foods Co. products, please advise us.

Sincerely,
Gail Wilson, Manager
Regulatory/Technical Information Systems
