

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****1.1 Product identifier**

- Trade name MIRATAINE H2C-HA

**1.2 Relevant identified uses of the substance or mixture and uses advised against****Uses of the Substance / Mixture**

- Surfactants for various applications
- (For further information, refer to the product technical datasheet)

**Remarks**

- This product may rapidly contribute towards a highly hazardous environment within a confined space (e.g. Within ISO tanks, reactors, silos, etc.).
- Risk assessments should be conducted prior to handling this product / material.

**1.3 Details of the supplier of the safety data sheet****Company**

Syensqo USA LLC.,  
2564 US HIGHWAY 1, LAWRENCE, NJ 08648 USA,  
Tel.: +1.609.860.4000

**1.4 Emergency telephone**

FOR EMERGENCIES INVOLVING A SPILL, LEAK, FIRE, EXPOSURE OR ACCIDENT, CONTACT CHEMTREC (24-Hour Number): +1-800-424-9300 within the United States and Canada, or +1-703-527-3887 for international collect calls.

**SECTION 2: Hazards identification**

Although OSHA has not adopted the environmental portion of the GHS regulations, this document may include information on environmental effects.

**2.1 Classification of the substance or mixture****HCS 2012 (29 CFR 1910.1200)**

- |                     |            |
|---------------------|------------|
| Skin irritation:    | Category 2 |
| Serious eye damage: | Category 1 |

**2.2 Label elements****HCS 2012 (29 CFR 1910.1200)****Pictogram****Signal Word**

- Danger

## MIRATAINE H2C-HA

Revision Date 07/29/2025

**Hazard Statements**

- H315 Causes skin irritation.
- H318 Causes serious eye damage.

**Precautionary Statements**Prevention

- P264 Wash skin thoroughly after handling.
- P280 Wear protective gloves/ eye protection/ face protection.

Response

- P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
- P305 + P351 + P338 + P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/ doctor.
- P332 + P313 If skin irritation occurs: Get medical advice/ attention.
- P362 Take off contaminated clothing and wash before reuse.

**2.3 Other hazards which do not result in classification**

- H401: Toxic to aquatic life.

**SECTION 3: Composition/information on ingredients****3.1 Substance**

- Not applicable, this product is a mixture.

**3.2 Mixture**

- Chemical nature Aqueous solution  
Sodium lauriminodipropionate

**Hazardous Ingredients and Impurities**

| Chemical name                | Identification number<br>CAS-No. | Concentration [%] |
|------------------------------|----------------------------------|-------------------|
| Sodium Lauriminodipropionate | 14960-06-6                       | >= 25 - < 30      |
| Sodium lauraminopropionate   | 3546-96-1                        | >= 1 - < 5        |

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

**Non Hazardous Ingredients and Impurities**

| Chemical name | Identification number<br>CAS-No. | Concentration [%] |
|---------------|----------------------------------|-------------------|
| Water         | 7732-18-5                        | 60- 70            |

**SECTION 4: First aid measures****4.1 Description of first-aid measures****General advice**

- First responder needs to protect himself.
- Show this safety data sheet to the doctor in attendance.
- Place affected apparel in a sealed bag for subsequent decontamination.
- When symptoms persist or in all cases of doubt seek medical advice.

**In case of inhalation**

- Move to fresh air.
- Keep at rest.
- Consult a physician if necessary.

**In case of skin contact**

- Take off contaminated clothing and shoes immediately.
- Wash off immediately with soap and plenty of water.
- Use a mild soap if available.
- If skin irritation occurs, seek medical advice/attention.

**In case of eye contact**

- Rinse immediately with plenty of water, also under the eyelids.
- Take victim immediately to hospital.
- Continue rinsing eyes during transport to hospital.

**In case of ingestion**

- Do not induce vomiting without medical advice.
- Rinse mouth with water.
- Do not give anything to drink.
- Keep at rest.
- Consult a physician if necessary.

**4.2 Most important symptoms and effects, both acute and delayed**

- no data available

**4.3 Indication of any immediate medical attention and special treatment needed****Notes to physician**

- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

**SECTION 5: Firefighting measures****Flash point**

Not applicable, aqueous liquid for which the organic components have flash point > 100 °C / 212°F

Flammability class: Will burn

**Autoignition temperature**

No data available

**Flammability / Explosive limit**

No data available

**5.1 Extinguishing media****Suitable extinguishing media**

- Extinguishing media - small fires
- Water spray
- Multipurpose powders
- Carbon dioxide (CO<sub>2</sub>)
- Alcohol Resistant Aqueous Film Forming Foam (AR-AFFF)
- Extinguishing media - large fires
- Water spray

- Multipurpose powders
- Alcohol Resistant Aqueous Film Forming Foam (AR-AFFF)

**Unsuitable extinguishing media**

- Do not use a solid water stream as it may scatter and spread fire.

**5.2 Special hazards arising from the substance or mixture****Specific hazards during fire fighting**

- The pressure in sealed containers can increase under the influence of heat.
- Aqueous liquid. Does not present any particular risk in the event of a fire.
- Hazardous decomposition products formed under fire conditions.  
(following evaporation of water)
- High concentrations of toxic or harmful products may remain in the residual liquid once the fire has been extinguished.

**Hazardous combustion products:**

- Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).
- Nitrogen oxides (NOx)

**5.3 Advice for firefighters****Special protective equipment for fire-fighters**

- Firefighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing.
- Personal protective equipment comprising: suitable protective gloves, safety goggles and protective clothing.

**Specific fire fighting methods**

- Stay upwind.
- Fight fire with normal precautions from a reasonable distance.
- Do not use a solid water stream as it may scatter and spread fire.
- Cool down the containers / equipment exposed to heat with a water spray. Ensure that there is NO direct contact between the water and the product.
- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Further information**

- Evacuate personnel to safe areas.
- Intervention only by capable personnel who are trained and aware of the hazards of the product.
- Never approach containers which have been exposed to fire, without cooling them sufficiently.
- Collect contaminated fire extinguishing water separately. This must not be discharged into drains.
- Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures**

- Avoid inhalation, ingestion and contact with skin and eyes.
- Wear chemical resistant personal protective equipment.
- Wear suitable gloves.

- Wear suitable protective clothing.
- Wear as appropriate:
  - Face-shield
  - Tightly fitting safety goggles.
- In the case of dust or aerosol formation use respirator with an approved filter.
- In the case of vapor formation use a respirator with an approved filter.
- Stop leak if safe to do so.
- For further information refer to section 8 "Exposure controls / personal protection."

### 6.2 Environmental precautions

- Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems.
- Prevent further leakage or spillage if safe to do so.
- Contain the spilled material by diking.
- The product should not be allowed to enter drains, water courses or the soil.
- Spills may be reportable to the National Response Center (800-424-8802) and to state and/or local agencies

### 6.3 Methods and materials for containment and cleaning up

- Stop leak if safe to do so.
- Dam up with sand or inert earth (do not use combustible materials).
- Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder).
- Shovel or sweep up.
- Keep in suitable, closed containers for disposal.
- Never return spills in original containers for re-use.
- Wash nonrecoverable remainder with large amounts of water.
- Clean contaminated surface thoroughly.
- Recover the cleaning water for subsequent disposal.
- Decontaminate tools, equipment and personal protective equipment in a segregated area.
- Dispose of in accordance with local regulations.

#### Additional advice

- Material can create slippery conditions.

### 6.4 Reference to other sections

- 7. HANDLING AND STORAGE
- 8. EXPOSURE CONTROLS/PERSONAL PROTECTION
- 13. DISPOSAL CONSIDERATIONS

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

- Non-sparking tools should be used.
- Ensure all equipment is electrically grounded before beginning transfer operations.

- Handle in accordance with good industrial hygiene and safety practice.
- Avoid splashes.
- Avoid inhalation, ingestion and contact with skin and eyes.
- Avoid localized overheating.
- Vent drums while heating
- Mix thoroughly before use.
- Handle in accordance with good industrial hygiene and safety practice.
- Wear personal protective equipment.
- Wear suitable protective clothing.
- Avoid inhalation, ingestion and contact with skin and eyes.
- Avoid splashes.
- Avoid formation of aerosol.
- For personal protection, see section 8.

#### **Hygiene measures**

- Personal hygiene is an important work practice exposure control measure and the following general measures should be taken when working with or handling this materials:
  - 1) Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.
  - 2) Wash hands and face carefully before eating, drinking, using tobacco, applying cosmetics, or using the toilet.
  - 3) Wash exposed skin promptly to remove accidental splashes or contact with material.
- The user is responsible for monitoring the working environment in accordance with local laws and regulations.

### **7.2 Conditions for safe storage, including any incompatibilities**

#### **Technical measures/Storage conditions**

- Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems.
- Keep containers tightly closed in a dry, cool and well-ventilated place.
- Keep away from open flames, hot surfaces and sources of ignition.
- Keep away from incompatible materials to be indicated by the manufacturer.
- Do not freeze.
- Keep away from: Hazardous reactions may occur on contact with certain chemicals. (Refer to the list of incompatible materials section 10: "Stability-Reactivity").

#### **Requirements for storage rooms and vessels**

**Recommended storage temperature:** 59 - 120 °F (15 - 49 °C)

- Do not freeze.

### **7.3 Specific end use(s)**

- no data available

## **SECTION 8: Exposure controls/personal protection**

Introductory Remarks: These recommendations provide general guidance for handling this product. Because specific work

environments and material handling practices vary, safety procedures should be developed for each intended application. Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.

### 8.1 Control parameters

- Contains no substances with occupational exposure limit values.

### 8.2 Exposure controls

#### Control measures

##### **Engineering measures**

- Where engineering controls are indicated by use conditions or a potential for excessive exposure exists, the following traditional exposure control techniques may be used to effectively minimize employee exposures :
- Effective exhaust ventilation system.
- Ensure adequate ventilation.
- Extract at emission point.
- Ensure that extracted air cannot be returned to the workplace through the ventilation system.
- Avoid splashes.
- Avoid formation of aerosol.

#### Individual protection measures

##### **Respiratory protection**

- This should be achieved by a good general extraction and -if practically feasible- by the use of a local exhaust ventilation.
- When respirators are required, select NIOSH/MSHA approved equipment based on actual or potential airborne concentrations and in accordance with the appropriate regulatory standards and/or industrial recommendations.
- Use a respirator with an approved filter if a risk assessment indicates this is necessary.

##### **Hand protection**

- Where there is a risk of contact with hands, use appropriate gloves.
- Gloves must be inspected prior to use.
- Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.
- Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

##### **Suitable material**

- Nitrile rubber
- Neoprene
- PVC
- butyl-rubber

##### **Eye protection**

- Eye and face protection requirements will vary dependent upon work environment conditions and material handling practices. Appropriate ANSI Z87 approved equipment should be selected for the particular use intended for this material.
- Eye contact should be prevented through the use of:
- Tightly fitting safety goggles.
- Face-shield

##### **Skin and body protection**

- Full protective suit
- Footwear protecting against chemicals.
- Choose body protection according to the amount and concentration of the dangerous substance at the work place.

##### **Hygiene measures**

- Personal hygiene is an important work practice exposure control measure and the following general measures

should be taken when working with or handling this materials:

- 1) Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.
- 2) Wash hands and face carefully before eating, drinking, using tobacco, applying cosmetics, or using the toilet.
- 3) Wash exposed skin promptly to remove accidental splashes or contact with material.
- The user is responsible for monitoring the working environment in accordance with local laws and regulations.

#### Protective measures

- Emergency equipment immediately accessible, with instructions for use.
- Ensure that eyewash stations and safety showers are close to the workstation location.
- Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the potential hazards, and/or risks that may occur during use.
- The protective equipment must be selected in accordance with current local regulations and in cooperation with the supplier of the protective equipment.

## SECTION 9: Physical and chemical properties

Physical and Chemical properties here represent typical properties of this product. Contact the business area using the Product information phone number in Section 1 for its exact specifications.

### 9.1 Information on basic physical and chemical properties

|                                                       |                                                                                                                                    |

common organic solvents: partly soluble

**Partition coefficient: n-octanol/water**

No data available

**Vapor pressure**

< 23.5 mmHg (< 31.33 hPa) ( 77 °F (25 °C))

**Density**

ca. 1.03 g/cm<sup>3</sup> ( 77 °F (25 °C))

**Relative density**

No data available

**Relative vapor density**

No data available

**Particle characteristics**

No data available

**Evaporation rate (Butylacetate = 1)**

No data available

**9.2 Other information**

**Oxidizing properties**

Not considered as oxidizing., Structure-activity relationship (SAR)

**SECTION 10: Stability and reactivity**

**10.1 Reactivity**

- Stable at normal ambient temperature and pressure.

**10.2 Chemical stability**

- Stable under recommended storage conditions.

**10.3 Possibility of hazardous reactions**

- No dangerous reaction known under conditions of normal use.
- Hazardous polymerization does not occur.

**10.4 Conditions to avoid**

- Keep away from open flames, hot surfaces and sources of ignition.
- Avoid excessive heat for prolonged periods of time.

**10.5 Incompatible materials**

- Strong oxidizing agents
- Strong reducing agents
- Strong acids
- Strong bases

**10.6 Hazardous decomposition products**

- On combustion or on thermal decomposition (pyrolysis), releases:
- Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).
- Nitrogen oxides (NO<sub>x</sub>)

**SECTION 11: Toxicological information**

**11.1 Information on toxicological effects**

**Acute toxicity**

**Acute oral toxicity**

## MIRATAINE H2C-HA

## MIRATAINE H2C-HA

Revision Date 07/29/2025

In vitro gene mutation study in mammalian cells  
Strain: Chinese hamster ovary cells  
with and without metabolic activation

negative  
Method: OECD Test Guideline 476  
Unpublished reports

**Genotoxicity in vivo****Carcinogenicity**

No data available

No data available

This product does not contain any ingredient designated as probable or suspected human carcinogens by:

NTP  
IARC  
OSHA

**Toxicity for reproduction and development****Toxicity to reproduction / fertility**

Sodium Lauriminodipropionate

Reproduction / developmental toxicity screening test - Rat, male, Oral exposure  
Fertility NOEL: 600 mg/kg  
Developmental Toxicity NOAEL F1: 600 mg/kg  
Method: OECD Test Guideline 422  
Reproduction / developmental toxicity screening test - Rat, female, Oral exposure  
Fertility NOEL: 600 mg/kg  
Method: OECD Test Guideline 422

category approach, tested on C12-C18, Gavage, Unpublished reports, no  
impairment of fertility has been observed, No effect observed in male or female  
reproductive system in repeated dose tox studies .

**Developmental Toxicity/Teratogenicity**

Sodium Lauriminodipropionate

Rat, male and female, Dermal  
Method: OECD Test Guideline 414  
Published data, No effect observed on development, no embryotoxic or  
teratogenic effects have been observed

**STOT****STOT-single exposure**

Sodium Lauriminodipropionate

The substance or mixture is not classified as specific target organ toxicant, single  
exposure according to GHS criteria.  
Internal evaluation., tested on C12

**STOT-repeated exposure**

Sodium Lauriminodipropionate

The substance or mixture is not classified as specific target organ toxicant,  
repeated exposure according to GHS criteria.  
category approach, tested on C8-C18, Internal evaluation.

Sodium Lauriminodipropionate

Oral exposure 28 Days - Rat , male  
NOAEL: 160 mg/kg  
Oral exposure 49 Days - Rat , female  
NOAEL: 160 mg/kg

Method: OECD Test Guideline 422  
category approach  
tested on C12-C18  
Subacute toxicity  
Gavage  
Unpublished reports  
Not considered to cause serious damage to health on repeated exposure

**Experience with human exposure**  
**Aspiration toxicity**No data available  
No data available**SECTION 12: Ecological information****12.1 Toxicity****Aquatic Compartment****Acute toxicity to fish**

Sodium Lauriminodipropionate

By analogy

LC50 - 96 h : 4.2 mg/l - Oncorhynchus mykiss (rainbow trout)  
semi-static test  
Analytical monitoring: no

Method: OECD Test Guideline 203

Fresh water

Unpublished reports

Toxic to fish.

Information given is based on data obtained from similar substances.

**Acute toxicity to daphnia and other aquatic invertebrates**

Sodium Lauriminodipropionate

EC50 - 48 h : 1.71 mg/l - Daphnia magna (Water flea)  
static test

Analytical monitoring: yes

Method: Directive 67/548/EEC, Annex V, C.2.

Fresh water

Unpublished reports

Toxic to aquatic invertebrates.

**Toxicity to aquatic plants**

Sodium Lauriminodipropionate

By analogy

ErC50 - 72 h : 31 mg/l - Chlorella vulgaris (Fresh water algae)  
static test

Analytical monitoring: no

Method: OECD Test Guideline 201

Fresh water

Unpublished reports

Harmful to algae.

Information given is based on data obtained from similar substances.

**Toxicity to microorganisms**

Sodium Lauriminodipropionate

EC10 - 3 h : 330 mg/l - activated sludge  
static test

Method: OECD Test Guideline 209

Fresh water

Unpublished reports

**Chronic toxicity to fish**

No data available

**Chronic toxicity to daphnia and other aquatic invertebrates**

Sodium Lauriminodipropionate

NOEC: 15 mg/l - 21 Days - Daphnia magna (Water flea)  
semi-static test

Analytical monitoring: yes  
 Method: OECD Test Guideline 211  
 Fresh water  
 Unpublished reports  
 No adverse chronic effect observed up to and including the threshold of 1 mg / L.

## 12.2 Persistence and degradability

### Abiotic degradation

**Stability in water** Conclusion is not possible for a mixture as a whole.

**Photodegradation** Conclusion is not possible for a mixture as a whole.

### Physical- and photo-chemical elimination

**Physico-chemical removability** Conclusion is not possible for a mixture as a whole.

### Biodegradation

**Biodegradability** As (bio)degradability is not relevant for mixtures, all the components of the mixture were assessed individually (rapid degradability assessment available below).

### Degradability assessment

Sodium Lauriminodipropionate The product is considered to be rapidly degradable in the environment

## 12.3 Bioaccumulative potential

### **Partition coefficient: n-octanol/water**

Sodium Lauriminodipropionate Due to the distribution coefficient n-octanol/water, accumulation in organisms is not expected.

**Bioconcentration factor (BCF)** No data available

## 12.4 Mobility in soil

**Adsorption potential (Koc)** Conclusion is not possible for a mixture as a whole.

**Known distribution to environmental compartments** No data available

## 12.5 Results of PBT and vPvB assessment

Sodium Lauriminodipropionate Not persistent, bioaccumulative, and toxic (PBT).  
 Not very persistent and very bioaccumulative (vPvB).

## 12.6 Other adverse effects

### Ecotoxicity assessment

#### **Short-term (acute) aquatic hazard**

Sodium Lauriminodipropionate Toxic to aquatic life.

#### **Long-term (chronic) aquatic hazard**

Sodium Lauriminodipropionate No adverse chronic effect observed up to and including the threshold of 1 mg / L.

**SECTION 13: Disposal considerations****13.1 Waste treatment methods****Product Disposal*****Prohibition***

- Do not discharge directly into the environment.
- Dispose of in accordance with local regulations.
- Chemical additions, processing or otherwise altering this material may make the waste management information presented in this SDS incomplete, inaccurate or otherwise inappropriate. Please be advised that state and local requirements for waste disposal may be more restrictive or otherwise different from federal laws and regulations. Consult state and local regulations regarding the proper disposal of this material.

**Waste Code**

- Environmental Protection Agency
- Hazardous Waste – NO

**Advice on cleaning and disposal of packaging*****Prohibition***

- Do NOT dispose of untreated packaging with industrial waste.
- Do not dispose of with domestic refuse.
- Empty remaining contents.
- Clean using steam.
- Monitor the residual vapors.
- Dispose of rinse water in accordance with local and national regulations.
- Containers that cannot be cleaned must be treated as waste.
- Dispose of contents/ container to an approved waste disposal plant.
- Dispose of in accordance with local regulations.
- Where possible recycling is preferred to disposal or incineration.
- The recycled material must be completely dry and free of pollutants.

**SECTION 14: Transport information****49 CFR**

not regulated

**TDG**

not regulated

**NOM**

not regulated

**IMDG**

not regulated

**IATA**

not regulated

Note: The above regulatory prescriptions are those valid on the date of publication of this sheet. Given the possible evolution of

transportation regulations for hazardous materials, it would be advisable to check their validity with your sales office.

## SECTION 15: Regulatory information

### 15.1 Notification status

| Inventory Information                                                                    | Status                                                                                                                                                                                                                                                                                                                                                                                            |

| Japan. CSCL - Inventory of Existing and New Chemical Substances                          | - Listed on Inventory                                                                                                                                                                                                                                                                                                                                                                             |
| Korea. Korean Existing Chemicals Inventory (KECI)                                        | - Listed on Inventory                                                                                                                                                                                                                                                                                                                                                                             |
| China. Inventory of Existing Chemical Substances in China (IECSC)                        | - Listed on Inventory                                                                                                                                                                                                                                                                                                                                                                             |
| Philippines Inventory of Chemicals and Chemical Substances (PICCS)                       | - Listed on Inventory                                                                                                                                                                                                                                                                                                                                                                             |
| Taiwan Chemical Substance Inventory (TCSI)                                               | - Listed on Inventory                                                                                                                                                                                                                                                                                                                                                                             |
| New Zealand. Inventory of Chemical Substances                                            | - All components are listed on the NZIoC inventory. Additional HSNO obligations may apply. Please refer to Section 15 of SDS for New Zealand.                                                                                                                                                                                                                                                     |
| EU. European Registration, Evaluation, Authorization and Restriction of Chemical (REACH) | - When purchased from a Syensqo legal entity based in the EEA ("European Economic Area"), this product is compliant with the registration provisions of the REACH Regulation (EC) No. 1907/2006 as all its components are either excluded, exempt, and/or registered. When purchased from a legal entity outside of the EEA, please contact your local representative for additional information. |
| Korea. Act on Registration and Evaluation of Chemicals                                   | - When purchased from a Syensqo legal entity based in Korea, this product is compliant with "Act on Registration and Evaluation of Chemicals" (AREC or K-REACH, Article 10) as all its components are either excluded, exempt, and/or (pre)registered. When purchased from a legal entity outside of Korea, please contact your local representative for additional information.                  |

### 15.2 Federal Regulations

#### US. EPA EPCRA SARA Title III

## MIRATAINE H2C-HA

Revision Date 07/29/2025

**SARA HAZARD DESIGNATION SECTIONS 311/312 (40 CFR 370)**

|                                      |     |
|--------------------------------------|-----|
| Skin corrosion or irritation         | Yes |
| Serious eye damage or eye irritation | Yes |

The categories not mentioned are not relevant for the product.

**Section 313 Toxic Chemicals (40 CFR 372.65)**

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

**Section 302 Emergency Planning Extremely Hazardous Substance Threshold Planning Quantity (40 CFR 355)**

This material does not contain any components with a section 302 EHS TPQ.

**Section 302 Emergency Planning Extremely Hazardous Substance Reportable Quantity (40 CFR 355)**

This material does not contain any components with a SARA 302 RQ.

**Section 304 Emergency Release Notification Reportable Quantity (40 CFR 355)**

This material does not contain any components with a section 304 EHS RQ.

**US. EPA CERCLA Hazardous Substances and Reportable Quantities (40 CFR 302.4)**

This material does not contain any components with a CERCLA RQ.

**15.3 State Regulations****US. California Safe Drinking Water & Toxic Enforcement Act (Proposition 65)**

This product does not contain any chemicals known to the State of California to cause cancer, birth, or any other reproductive defects.

**SECTION 16: Other information****NFPA (National Fire Protection Association) - Classification**

|                           |           |
|---------------------------|-----------|
| Health                    | 3 serious |
| Flammability              | 1 slight  |
| Instability or Reactivity | 0 minimal |

**HMIS (Hazardous Materials Identification System (Paint & Coating)) - Classification**

|              |                                                   |
|--------------|---------------------------------------------------|
| Health       | 3 serious                                         |
| Flammability | 1 slight                                          |
| Reactivity   | 0 minimal                                         |
| PPE          | Determined by User; dependent on local conditions |
